The following is an examiner's statement of reasons for allowance: After careful consideration of the Applicant's remarks the Examiner has found the independent claims are allowable. There is no evidence in the prior art of an intervertebral reduction system, comprising a plurality of reduction elements positionable in an intervertebral space adjacent one another in contact with bony tissue, wherein said plurality of reduction elements act one upon the other upon sequential positioning thereof in the intervertebral space to compress cancellous bony tissue and apply an outwardly directed corrective force in the vertebral body, wherein said plurality of reduction elements are selected in number to occupy a reduction element_volume within the intravertebral space that body obtains a desired vertebral reduction voids between respective ones of said plurality of reduction elements; and means for fixing said plurality of reduction elements at said reduction element volume in engagement with one another in the intravertebral space in a manner maintaining the obtained vertebral reduction despite variations in spinal loading, said means including material filling said voids and locking said plurality of reduction elements relative to one another.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
